DETAILED ACTION

Priority

This application appears to be a division of Application No. 10/236,397 now Patent No. 6,831,030, filed 5 September 2002. A later application for a distinct or independent invention, carved out of a pending application and disclosing and claiming only subject matter disclosed in an earlier or parent application is known as a divisional application or "division." The divisional application should set forth the portion of the earlier disclosure that is germane to the invention as claimed in the divisional application.

Information Disclosure Statement

The information disclosure statements (IDS) submitted on 12 April 2004 and 17 February 2005 have been considered by the examiner.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claim 18 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 18 is rejected under 35 U.S.C. 112, second paragraph, as being process claim with no clearly defined active process steps. See Ex. Parte Elrich, 3 USPQ2d1011 (1987).

Art Unit: 1755

Regarding claim 18, the phrase "predetermined value" is considered vague and indefinite since the term "predetermined" merely means determined beforehand. The examiner suggests adding the specific values of amounts of Fe_2O_3 and ZnO that are increased and decreased. Additionally, it is unclear how the increasing and decreasing of the Fe_2O_3 and ZnO content is determined. For example, if Fe_2O_3 is increased does that mean the amount of ZnO is increased or decreased. The Examiner recommends amending the claim accordingly. See *Seagram and Sons Inc. v Marzell*, 84 USPQ 180.
